Dear Jieun and Moonsang,

I'm the track chair for the container infrastructure track and wanted to briefly clarify something about your talk proposal titled "Building a CSP with OpenStack & Kubernetes: Pain, Power, and Progress". It is currently submitted as a panel, but the abstract sounds like a talk, so we wanted to reach out to ask if this is accurate.

Looking forward to hearing from you.

Best,  
Josie

To: Josephine Pfeiffer &lt;jpfeiffe@redhat.com&gt;

we want to share our story about building CSP Platform. could you tell me what's the difference between panel and talk? i guess our presentation will contain just little technical issue.

thank you!

a panel is like a moderated discussion and a talk is a presentation. does that make sense?
